

To interested candidates,

We are looking to hire two candidates to complete a dual internship at Somerby Golf Club and Rochester Golf and Country Club. The candidates will work at separate courses and switch every three weeks giving you efficient time to finish any cultural practices being done at that time. This will provide a unique opportunity to experience the maintenance practices of two very different private golf courses.

Somerby Golf Club is located in Byron, MN and managed by O.B. Sports. The course was designed by Tom Lehman / John Fought and built in 2004. The course has bentgrass greens, tees and fairways. Somerby is ranked in the top ten courses in Minnesota and has been the host of two Nationwide Tour events. Rochester Golf and Country Club is located in Rochester, MN and managed by Troon Golf. The club was established in 1916 and the course was designed in 1926 by A.W. Tillinghast. The course is a bentgrass / poa mix from tee to green. Rochester Golf and Country Club is ranked in the top twenty courses and is one of the oldest and mature courses in Minnesota. The two courses are located only ten minutes apart.

At both facilities interns will participate in many cultural and daily activities that will enhance their understanding of very detailed golf course operations. Each candidate will have the benefit of working on different irrigation systems, grass types, equipment and much more.

The ideal candidates will be committed to professionalism, willing to put forth a strong effort towards their education, and have fun while completing their internship at Somerby Golf Club and Rochester Golf & Country Club. Interns will make \$8-10.00/hr., based on experience, and will be provided with their uniform, meals, and have golfing privileges. Housing available for rent. Please have resumes in by February 18th.

Please send resumes to:
