

### Limited Enrollment and Refunds

Due to the “hands-on” nature of this workshop, enrollment is limited to 60 people per day. Concurrent sessions of 20 to 30 registrants will limit class size and provide a better learning atmosphere. To ensure your enrollment, enclose registration fees with the attached form to Purdue University. In the event of over-enrollment, priority will be given to paid registrants.

Should it be necessary to cancel a workshop, registered participants will receive a full refund of paid fees. If such a cancellation occurs, Purdue University will mail a notice to participants one week prior to the event.

Written requests for refunds received one week prior to a workshop date will be honored in full.

Purdue University is not responsible for any expenses incurred by the registrant.

## Purdue Crop Diagnostic Training & Research Center

### 2006 TRAINING WORKSHOPS

The mission of the Crop Diagnostic Training and Research Center is to develop and deliver educational information and opportunities in crop production diagnostics and integrate these with practical problem solving experiences (skills) into a systems approach to crop production management.

Purdue University Crop Diagnostic Training and Research Center

The Purdue University Crop Diagnostic Training and Research Center is known across the Midwest for its unique “hands-on” approach for teaching the art and science of accurately diagnosing agricultural crop problems. The Center is designed to provide informative topics in a “real world” environment, where agriculturalists can sharpen their crop problem trouble-shooting skills and evaluate new and alternative management strategies.

Training workshops are valuable for individuals identifying insect, nematode, herbicide, soil fertility, and disease problems in corn, soybeans, forages, and small grains. These workshops also provide pertinent information on interacting factors (nutrient, pest, and environmental stresses) that impact crop growth and development.

The long term goal of the Center is to provide quality, state-of-the-art training in all aspects of crop production and management.

Location

The diagnostic training workshops will be conducted at the Purdue Agronomy Center for Research and Education (ACRE) located near West Lafayette, Indiana. West Lafayette is 65 miles northwest of Indianapolis, Indiana, and 120 miles southeast of Chicago, Illinois. The ACRE is located approximately five miles west of West Lafayette, Indiana on U.S. 52. (Signs will be posted.)

**Registration opens at 8:00 a.m. Eastern Time. All workshops will begin at 8:30 a.m. and conclude by 4:30 p.m.**

Continuing Education

All workshop participants will be awarded:

Continuing Education Units\* (CEUs) for Certified Crop Advisors

and/or

Continuing Certification Hours (CCHs) for Indiana Commercial Pesticide Applicators.

Topics covered at the workshop will determine the categories and hours awarded.

\*The Continuing Education Units are only applicable to the ASA/CCA Continuing Education Program.

Workshop Dates

Open to Public

June 15  
Forage Management Workshop

June 16  
Integrated Problem Solving Workshop

July 13  
Mid Season Diagnostic Workshop

August 29  
Late Season Diagnostic Workshop
