swettsch@purdue.edu

This course is designed to provide FIRE/Rescue, EMS personnel, and Farm Operators with a better understanding of strategies for preventing and responding to farm accidents. This 2 day course is designed as a comprehensive introduction to various farm accident rescue responses. This course will include state of the art farm accident rescue strategies, and first-responder injury prevention. Day one will include classroom discussion and live demonstrations, and day two will be hands on rescue procedures with live patient extrication and trauma care.

Registration Fee - \$175 per person
