ACRE Safety Thought—Safety is as much an “attitude” as it is a set of rules”. Researchers and other ACRE users should consider safety training for themselves and employees. Then practice safely.

Jim Beaty’s #1 reason that you should think about safety. “I care about everyone’s life and health. You should care about yours’ and your workers too.”

Jim’s #2 reason; “I don’t want to have to call or face a loved one with bad news about a death or injury. I would break my heart. You don’t either.”

Plan, think and work safely at the ACRE.

Thanks, Jim
